**FLOW MEASUREMENT COURSE** This Flow School: Course 1 & 2: F-100 will start by providing maintenance and engineering personnel with a basic understanding of numerous flow technologies. This basic portion will focus on concepts applicable to any manufacturer’s equipment. Following this introduction, we will proceed with in-depth training on magnetic and Coriolis flow meters. Next, this course will proceed into the advanced flow course on Wednesday. This advanced course will start with in-depth training on vortex, magnetic, ultrasonic, and Coriolis flow meters. The class will be a combination of classroom and hands-on training on the Vector Controls Process Training Unit, a full-scale, working process skid with on-line instrumentation and controls.
